A NEW NOVEL BY MRS. MARSH.

Of the Academie Francisies, author of Oemocracy in America.

Translated by Joins Bonnes, eq.

12mo Muslin, \$1.

A caim, philosophical inquiry into the cause of the French Revolution, and the working of the Old Regime. In this work M. Be Tocqueville has discurred by self-french political society into the gold monachy; shown in where the real power tay, and how if affect ed individual Frenchmen in the daily avecations of life, what was the real condition of the tability, of the clergy, of the middle classes, of the "people," of the peasanty, wherein France differed from all other contintes in Europe; why a revolution was inevitable. The information derived under these various heads, it may safely be said, is now first printed. It has been obtained, as M. De Tocqueville information in analy from the manuscript records of the old i tendants' offices and the Council of State. Of the labor devoied to the task, an idea may be formed from the author's statement that more than one of the thirty old chapters contained in the volume alone cost him a year's researches.

1 trust" may M. De Tocqueville in his Prevace, "that I have written his weak without prejudice; out I caused say I have written his weak without prejudice; out I caused say I have written without feeling. It wou does carcely proper for a Frenchman to be caim when he speaked his country as thirks of the times in which we live. I scannowledge, therefore, that in study is the society of the Old Regime in all its details, I have never lost sight of the society of our own day."

The written which has only the society of the priper and the Emperical Caused should be added, that these aluasiums are not eulogistic of the powers that he second countries.

"Evelyn Marston" is one of the better class of this writer's novels. That no other weekly religious newspaper ever met with the success of THE INDEPENDENT must now be universally admitted. It has been the aim of the proprietors, without regard to expense, to make it task in point of talent as high as the test journs of a similar character in the world; and to make it popular oil, so far as this could be done by greating being and character in the nather Christian duty— not as bleasing must be the same of the state of Christian duty— not as bleasing must be the same of the
